Secondary

SOAP · Docker · Laravel · Slim · Jenkins · Node.js · Materialize CSS · JSF · SVN · Kong

LANGUAGES

- Spanish — Native
- English — Intermediate

PROFESSIONAL PROFILE

Ssr. full stack web developer with 6+ years of experience. With a problem-solving oriented profile and great learning capabilities, I gradually incorporated different languages and frameworks into my stack. I mainly worked with PHP (Symfony) and Java (Spring Boot) on the backend and with Vue.js as the JavaScript framework on the frontend.

WORK EXPERIENCE

Web developer at "Colegio de Escribanos de la Provincia de Buenos Aires" (Notary Public Association)

July 2020 - present

As a developer, I took part in analysis and development of new applications and webservices. We switched from a monolytic approach to an ecosystem with multiple APIs, databases and web apps.
Main activities:
– Frontend applications with Vue.js and Tailwind CSS.
– RESTful APIs development with Spring Boot (Java).
– Minor developments with Node.js (websockets management with socket.io and PDF generation whit Puppeteer).
– Spring + JSF applications maintenance.
– Kong used as API Gateway.
– CI/CD with Gitlab + Jenkins.

Web developer at "Dirección Provincial de Sistemas de Información y Tecnologías" (Buenos Aires Province government)

May 2017 - December 2020

Member of the development team assigned to modernize organization's web applications and services. I progressively gained experience until I became one of the key references on the team, helping and training new developers.
Main activities:
– PHP 5.3 legacy applications maintenance. Redisign with Materialize CSS and jQuery.
– SOAP webservices development and maintenance.
– Slim Framework used to expose SOAP webservices as REST APIs.
– MVC applications with Symfony (PHP). Frontends with Vue.js and Materialize CSS.
